

FCC, I would like for the XM radio to stay on the air. I live in a border town of Nogales, Az/Nogales, Sonora. I am not of Mexican decent and I do not understand the language. I can only receive spanish speaking radio, even when I went out and bought an antenna to try to pick up stations in Tucson. This is a God send for me!!! I also use it in my automobile, not only here in Nogales, but on the open road, as I get better reception, and the stations I want to listen to.

PLEASE, do not allow this to be shut down. It will be an in convinence for myself as well as others who have the same problem.
